## DETAILED ACTION

### ***Response to Amendment***

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn..

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Han et al (US 5,818,903), in view of Alajajian (US 5,668,880).
3. In regards to claims 1, 6, 7, 9, 10, 11, 12, 16, 22, 23, 27, 30, and 31, Han discloses a method for handling an unsuccessful synchronous call attempt from a calling party to a called party, said method comprising: monitoring a synchronous call attempt from said calling party to said called party (col. 1-2 lines 47-39); determining at least one communication address related to said called party (col. 6 lines 28-44); and dropping said synchronous call attempt to said called party (col. 2 lines 3-14 and col. 7 lines 24-42). Han, however, does not disclose receiving a message composed by the calling party; and sending said message to said determined communication address. Alajajian, however, does disclose receiving a message composed by the calling party;

and sending said message to said determined communication address (col. 7 lines 9-30, col. 13 lines 35-44, col. 22 lines 37-61, and col. 24-25 lines 66-9). Therefore, it would have been obvious for one of ordinary skill in the art at the time of the invention to employ the method with the feature of being able to receive and send messages composed by the calling party. This feature would allow the calling party to be able to compose and send messages pertaining to the failure of unsuccessful call attempts, without having to wait for the terminal (caller's device) to send the message.

4. In regards to claims 2, 3, 17, and 18, Han discloses the method and computer readable medium, further comprising determining that said synchronous call attempt to said called party is unsuccessful (col. 3 lines 30-36, col. 7 lines 6-15, and col. 9 lines 18-25).
5. In regards to claims 4, 19, and 28, Alajajian discloses the method and computer readable medium, wherein said indication comprises said calling party pressing a predetermined key or keys on a communication device (col. 24-25 lines 66-9).
6. In regards to claims 5, 20, and 29, Alajajian discloses the method and computer readable medium, wherein said indication comprises said calling party using a vocal command (col. 26 lines 22-43).
7. In regards to claims 8 and 21, Han discloses the method and computer readable medium, wherein said at least one communication address comprises at least one of a telephone number, pager number, e-mail address, voice messaging address, mobile phone number, and Internet instant messaging address (col. 6 lines 28-44).

8. In regards to claims 13, 14, 15, 24, 25, and 26, Alajajian discloses the method and computer readable medium, wherein said receiving a message composed by a calling party (col. 7 lines 9-30, col. 13 lines 35-44, col. 22 lines 37-61, and col. 24-25 lines 66-9) comprises: where said at least one communication address related to the called party comprises a plurality of communication addresses, presenting said calling party with a list of messaging options based on said plurality of communication addresses; allowing the calling party to select a messaging option for use; and commencing a message compose session related to said selected messaging option and pre-filling a communication address for said message with a communication address related to said messaging option (col. 10 lines 23-34 and col. 10 lines 50-54).

#### ***Response to Arguments***

9. Applicant's arguments with respect to claims 1-31 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McLampy et al (US 5,862,208) teach a method and system for enabling a party to change terminals during a call.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thjuan P Knowlin whose telephone number is (703) 308-1727. The examiner can normally be reached on Mon-Fri 8:00-4:30pm.
